

# OWNER'S MANUAL

## SS210M MANUAL SNAPPER SHEAR

### **ASSEMBLY**

Attach foot to rear of tool using nut and bolt provided. It is recommended that the tool be securely mounted and used with a table for feeding material.

### **MAINTENANCE**

#### **LUBRICATION**

Occasionally lubricate moving parts with light oil.

#### **BLADE REPLACEMENT**

To replace blades, remove shoulder bolt nearest handle and 4" bolt at other end of upper blade holder and swivel handle open on front links. Remove blade holder. Loosen (NOT REMOVE) the bolts above top blade and below bottom blade. Slide old blades out and replace with genuine Snapper Shear blades. Make sure that shims in upper and lower blade holders remain in place and re-tighten bolts. Set upper blade holder in place, swivel handle back into operating position, and replace and tighten shoulder bolt and 4" bolt.

## **OPERATION**

### **CAUTIONS**

- Always wear approved safety glasses when using the SS210M.
- Never operate the SS210M while wearing loose clothing or jewelry.
- Never operate the SS210M without its plastic guards in place.
- Use only genuine Snapper Shear replacement parts.

### **CUTTING**

When making straight cuts, simply line the product up with the guides provided on the far left of the rollers. Push down on the handle with one or both hands, whichever is comfortable. If you need to cut gable angles that exceed the preset capacity of the shear, adjust the nuts on the right side of the shear to lift the right side of the shear. This will allow you to cut a larger angle with your shear.

### **REPLACEMENT PARTS**

20011	BLADE SET (PAIR)
20024	SHIMS (PAIR)
20022	GUARD (EACH)
SS210S	FEED TABLE PACKAGE

### **WARRANTY**

Every Snapper Shear is tested and inspected prior to shipment. If the tool does not operate properly, please call for technical assistance or return your tool prepaid to us, be sure to include your name, address, and phone number. If tool is found to be defective in workmanship or material, repairs will be made without charge and tool will be returned to you. This warranty does not apply if you or others attempt repair, tool has been damaged or misused, repairs needed are due to normal wear, use is continued after partial failure, or parts other than ours have been installed. No other warranty, written or verbal is authorized.
